

Alan Melby is a professor of linguistics at Brigham Young University, Provo campus, where he is the director of the Translation Research Group. He is currently Secretary of the American Translators Association, Chair of the Translation and Computers Committee of the ATA, and Chair of the Translation Technology Committee of FIT (the International Federation of Translators). He is also president of LTAC Global, the consortium that is spearheading the Global Event Terminology project (GEvTerm). He was the primary developer of Mercury-Termex, the first PC-based terminology management system and has long been involved in the development of interchange formats for terminology, beginning with MicroMater and including the TEI terminology chapter, MARTIF, and TBX.
