Dr. Jennifer DeCamp is a Principal Network and Distributed Systems Engineer at MITRE Corporation, where she works with foreign language and multilingual technology. Dr. DeCamp supports the U.S. government in their analysis and solutions for foreign language needs, mainly through the government Foreign Language Committee. She formerly worked with foreign language technology at Xerox Corporation. Dr. DeCamp is a member of the Interagency Language Roundtable, the Federal Society of Linguists, the American Translators Association, the Association of Computational Linguists, the Defense Exchange Committee on Language Efforts, and the Defense Language Working Group. In TC 37, she is active in developing standards for language codes, translation-related standards, and interchange formats.
